Summary

Full Stack Developer with over two years of experience in real-world software development. Distinguished by a high degree of technical autonomy, I possess a proven track record of leading full-feature lifecycles and complex system migrations. A multilingual professional and Agile practitioner, I specialize in bridging backend architecture with user-centered design to deliver scalable, high-performance digital products .

Education

Bulacan State University Sarmiento Campus	College • GPA 1.75
Bachelor of Science in Information Technology	R374+7VV, Kaypian Rd, SJDM, Bulacan • 2024 - 2026
Immaculate Conception Polytechnic	Senior High School • 89
TVL Information Communication Technology	RX96+4XG, Marian Rd, Poblacion, Santa Maria, 3022 Bulacan • 2018 - 2020

Experience

Juanwork	110 Chico St East Rembo Makati 1217
Full Stack Web Developer Freelancer (Hybrid)	Apr 2024 - Jan 2026
Internship Team Leader Hybrid	Jan 2026 - March 2026
• Tech Stack: 1yr Legacy (PHP, JQuery, MySQL, MVC, RestAPI, Paymongo, Hostinger, etc) & 1yr Modern Migration (ReactJS, Next Drizzle ORM, Postgre, Docker, FastAPI, Xendit, Neon, etc.) During my tenure at Juanwork, I functioned as a core developer with a high degree of technical ownership: • Autonomy & Ownership: Operated independently without senior supervision, taking full accountability for the implementation of complex features. • System Architecture: Developed and optimized core system flows for both freelancer and client-facing modules. • Efficiency & Automation: Engineered original features to enhance system performance and created custom automation scripts to streamline daily workflows. • Stakeholder Communication: Conducted high-level technical demonstrations for stakeholders during conferences to showcase system capabilities. • Agile Collaboration: Actively contributed to daily stand-ups and monthly strategy meetings within an Agile framework.	

Projects

Juanwork v1.0	Apr 2024 - 2025
JuanWork serves as a comprehensive freelancing platform where clients can post projects, browse freelancers, manage proposals, and process payments securely.	
Juanwork v2.0	2025 - Jan 2026
A fully overhauled version of JuanWork built with Next.js and Tailwind CSS, supporting comprehensive features for project management, bidding, messaging, and payments.	
E-Lock	June 2026 - June 2026
E-Lock is an IoT-enabled Lockout/Tagout (LOTO) safety system that replaces manual physical locks with automated, biometric machine isolation. Integrating ESP32 microcontrollers, AS608 fingerprint scanners, and shunt trip circuit breakers, it ensures high-risk industrial equipment remains de-energized during maintenance and can only be restored after verified physical clearance and digital authorization.	

Bentahub

June 2026 - July 2026

Bentahub, a unified digital platform built for the Lourdes Sari-Sari Store chain and its branches. This application replaces manual, paper-based business operations with a modern centralized system that tracks transactions, manages inventory, triggers low-stock alerts, and handles customer-facing product reservations in real time.

Portfolio

May 2026 - May 2026

A Next.js 16 based portfolio website implementing Feature-Sliced Design principles, smooth animations with Motion, and dark/light theme switching.

Mindtrack

March 2026 - March 2026

MindTrack is a web-based Patient Management and Online Appointment System built for the Wayside Psyche Resources Center, a mental health clinic. Its purpose is to digitize clinic operations by automating appointment scheduling, patient record management, and administrative reporting.

Vetsync

Jan 2025 - Feb 2025

VetSync is a multi-page web application providing an admin dashboard with user management, analytics tracking, system settings configuration, and messaging features.

FilEats

Feb 2025 - March 2025

FilEats connects home cooks and food enthusiasts who want to discover, share, and preserve traditional and modern Filipino recipes without expensive subscription barriers.
